Message Body

All,
 We have added two new members to our team per JV and WH. Elliott and John. Elliott will help with any and all banking issues with DB and John will assist us with B&F issues. Both will be added to the cut and both will receive 5% when LP is finished.

EL and JW – Attached you will find a task list that I have developed to take down LP and WM. Please assist us in any tasks that you feel is necessary. Or, please comment on what we are missing so the process can move forward and we all retire off WM “mistake”.

JR

John and Cindy,

It was good seeing the both of you again. I would have never thought in a million years that I would ever see the two of you still together after all these years. I have been working with several other companies to pull them out of bankruptcy and I have an idea on how to make some serious money for all of us. First, we need to have someone on the inside. This person will need to have access to everything. This will include computer systems, HR, accounting, etc. Once that person is in, we then can “move” or “copy” the information for our use. We will also need someone with the ability to get to know all the upper management.

John, you will be the person on the inside gaining all the information we need. We then can use and manipulate the data for our use. In another words, make the upper management think they are doing better then they think. This will allow us to crash the company faster and buy it at a lower cost. I have two major companies in mind that we will go after. LTV and Level Propane. Both companies have very little cost, but they both make major money. Along with LP, we will also gain access to all of WM’s companies including PP. PP is nothing more than a parking lot of money. You will send the information to a person to be named in the future, but until then, keep all records and data at your home.

Cindy, you will be the person to “wine and dine” the upper management. I don’t care how you do this or if you are on your back, we need to know everything about these people. If we have to use “dirt” to get them out, then so be it. There is no love lost here and we stand to make a ton of money.

law firm (B&F), and anyone else we will need to see these companies fall and be sold for our benefit. I will keep everyone up to date on what the tasks will be and when we need to have them completed. As long as no one opens their mouth, we will be in the clear and be retired by 2003 or 2004.

I look forward to seeing the both of you again at our favorite watering hole,

TW. J. Rudd

John,

Please see that the two new people, EL and JW are updated with a copy of the task list and the plan for LP and WM. I know EL and JW came to us from WH.

Walter,

Thank you for JW contact information. If you need any help with DB, please contact EL at Elliott Lester [ell.susa@erols.com]. He will be able to assist us with any and all banking issues including the new loan application for WM and LP. If we can pull that off and get WM approved, then we will know the terms of the loan and can force the hand to make him default on the loan.

John,

Per our conversation, if you have any questions about legal matters with the upcoming WM and LP matters, please contact John Wagner at John Wagner [jwagner@bigpond.net.au]. He is in association with B&F and know the LP legal matter very well. Please send me over the contact that you have for DB. I will need to review the new loan application that WM applied for.
